

## PALLET BOX 800X600 LIGHT I

This pallet box together with the wooden pallet creates a full value container, making it possible to store and transport loose goods, using of the pallets. There is a possibility of stacking up the pallet boxes, which allows to reduce the warehouse floor space necessary to store the same quantity of goods. An half-opened frame allows for easy access to the goods stored inside the box.

The ability to place substantial loads within a single box means that it is not only useful as a container for loosely packed lightweight goods, but also as a stable system for organizing heavier products within a small amount of floor space, maintaining easiness of their movement. Its small dimensions after folding (thickness of only 90mm) means that when a box is not being used, it does not take up excessive warehouse space.

**Standard finish:** zinc plated + lacquer.

**Technical data:** The structure of the box is made of steel wires and spot welded mesh. From the bottom and the top it is finished with corners made of plate. An half-opened frame on the side wall.
